Cleveland Electric Labs Client Portal Basic Navigation

Searching for Reports

You can search for reports three different ways, all from the first page that opens when you log in to the portal:

Option 1:

Enter your PO# and the Cert# which you can find on your tags or cert reports.

If you are using the PO# and Cert#, you must enter both, as neither is unique on its own.

Option 2:

Enter the report ID, which you can also find on your tags or cert reports. This ID is totally unique, so you can search with it by itself.

Option 3:

Use a QR code scanner plugged into your computer. To do this, simply click on the red "Scan" button and the below screen will appear.

Then, simply scan the QR code on your tag or cert report and you will see the associated cert report. You can either download the PDF, or a CSV file with all of the individual errors.

Order History

Within the Order History tab, you can search for past orders, or click back through a list of all your orders.

In the search bar, you can search for an order either by your purchase order number or our shop order number. Once the order appears below, simply click the "View" button and you will see all the order details. If cert reports are available for the items on that report, you can download either the CSV or the PDF.
